

Bob Jones Mexicali Earthquake Prophecy

A Warning for the major Earthquake that will Tear California Apart

BOB JONES:

Right off of San Diego, dolphins have come together from, I don't know how many places you'd have to come together, but they're seven miles long and five miles wide starting from San Diego. I really feel that this is a warning. Major warning. You and eye brought warnings on this in 89 Why would that many dolphins... Dolphins are on top of the water, a wonder what's going on under the water. Nature hears its warnings before things happen.

We ought to be praying for the United States because I think thanks to get ready to happen from San Diego to Seattle. That's what He told me a few years ago. And why would they be leaving? Well, recognize the same time we weren't together in California in 89. We both got prophecies we saw things of a coming earthquake that is beyond anything you can imagine.

And I've known that there was an archangel holding the place together in California. As California grieved The Father so much, that he's taken his hand over California was in we need to begin to pray for California. Where they will be that mercy and that grace.

RICK JOYNER:

But one of the things about the Lord showed us the big one coming. But He showed us a warning. We went around and we had specific details and it all happened. And it was shocking to us. One of the biggest shocks was how, I mean, we had specifics. It was clear, it happened just like we said and how many of the church leaders said, "Well, we don't believe that."

I mean, it's about as clear warning shot as you could be. And yet they said, "No, that's just nature." That was the shocking part to me. And you know, we really need to pray for hearing ears. And you know, there is such a spirit delusion, as we talked about yesterday, and as Paul warned, those who could not hear these

things. And we really need to pray for California. We need to pray for the whole west coast. But there are some who hear, there's some who are hearing, and the encouraging thing. Lately some that have been the most adamant saying, "This is not God. We don't believe this" have had their own dreams, their own visions, their own revelation. And now they really understand: no this is really coming down. This is really happening and I continue to pray for more time or get more people ready. But regardless what happens in the natural through human conflict, we have to get used to it being to harvest time. And we've got to understand this: We're not going to run from this. We're going to run to it. And you know, it says in Joshua when they crossed over the Jordan River it says the river overflowed all of its banks, all of the days of the harvest.

Of course Jordan River speaks of death. That's why Jesus baptized there, John baptized there and you know, it empties into the Dead Sea. And we really are coming in to Psalm 91, when 1,000 may fall over here and 10,000 over here, and we've got to stay focused and do our job.

You know, death has been swallowed up in victory. Some we're not afraid of it, it happens. We've got to learn to stay focused, keep doing our job. But we've got to learn also to run to those situations, not away from it, but we've been saying, Bob's been saying for many years now, unless you're here to stay, get out.

And I felt like you know, one of the things that Lord showed us that would preempt was the Japanese quake and tsunami. I felt years ago the Lord said, "When that happened, tell everyone to move from those areas who have not heard to stay." And we put that warning out, we keep it out.

Because I get asked all the time, "Well, it hasn't happened yet. It must not have been the Lord."

Listen, there prophecies in Scripture that took hundreds of years to happen. We've had many that took 20 years to happen. I don't know when it's gonna happen. I believe the Lord is going to give us some specifics, but I feel very much that it is imminent.

And the last several days, I've had this foreboding, a spiritual foreboding. I mean everything in the natural is going better than ever. I mean, I just don't have any reason to feel [this] but something is going on. When I've read about those

dolphins. This is not good. No, this is not good. It is proven that dolphins sense earthquakes days ahead of time. There's something that happens in the shifting of the magnetics of the area but as far as anyone knows what is going on with those dolphins out there right now, it's unprecedented. Nobody's heard of anything quite like it.

I am praying for California and I'm praying for such a revival, such a, you know, and Lord lesson this or if there's any way to even be spared. Because revival is turning to the Lord who knows what he might do, but we really need to be praying for our west coasts.

And the Lord is deeply, deeply offended by the poison, the spiritual and moral poison that is coming out of Hollywood. This is a terrible grief and he is not going to put up with it much longer.

BOB JONES:

Amen. Years ago, I don't remember how long but I think it was mid 70s. The Lord told me that He is going to give a warning in California.

And the shaking will begin and Caliente and Mexicali. When those two places shake, it will shortly happen in the other places. So I think that if people will listen, He's going to warn him. And I think the warning will be Mexicali, Caliente at the border line. And I think it's surely going to shake. If it does, then San Diego, Los Angeles, Frisco, right up the coast. I've never known which would go first. Frisco or Los Angeles.

But I have seen the tsunami that will come up the Los Angeles River. The height of it is beyond imagination. In places, it looked to me like it was over 200 feet tall.

Now, what's your part? Your parties is to get this into your soul. These things are going to come and you're going to go to go through them. They aren't going to take you under, you're going to go through them. Every bad thing that has happened in your lifetime. You're here. It's a sign you went through them. You survived them.

But this is what I think the Holy Spirit's been doing in your lives, is bringing you to a place of faith where you can survive what takes place when The Father removes His hand and The Father is removing His hand off of certain areas right now.

And I believe that this area that I am in here is an area of safety. I was told to come here. The first place I was told to go to Statesville. And I was told to move from Statesville to where I am right now. And I've had Him to tell me to move from certain areas at different times. And I think for many of you, find out what area that he wants you in. For there's going to be cities of refuge that's not even touched. There's gonna be some states that's hardly touched and it's going to be other states demolished. I brought a word about northeast states, that the father was removing his hand off of them, six months or more ago.

And why was The Father removing His hand from them? Because they all agreed on the same sex marriage. So the Father, when He removes His hand, what do you think's going to happen? Judgement

And so those living in northeast states, just look over what's happened to them since then.

You take Christ crashed out of school, and you got dead babies. You take Christ out of the marketplace, you got economy falling. You take Hiim out of the protection on the lines and you get dead cities. There was hurricanes. There were ridges falling. That young man that did all the killing, had he been introduced to Christ and school, that killing would've never happened.

One of our jobs in the last days is going to be bringing Christ back into the schools.

And I don't know how long they're gonna, some of the states, are going to take their punishment. Because they don't have a covering.

I would be terrorized if I didn't have Christ in my heart. I mean, you're talking about eternity in hell, eternally. I wish I could have the ability to show the people on the earth what hell is like, because the Lord has taken me there a couple of times. I don't ever want to go there again.

But hell is real. And so is heaven. You're on your way to heaven. And all of these jokers and everything they're on their way to hell. They don't know what they're on they're way to.

When the Father breathed into Adam, all man become eternal. he put his conscious inside them. So when you're conceived, a part of the God the Father comes into you becomes you're conscience. And if you let your conscience be your guide, then you're gonna spend eternity in heaven.

This life down here is just like a drop in the bucket. It's so quick. But it determines where you'll spend eternity.

Now, I've seen heaven. More than twice. And it's so beautiful. Everything there is beauty. Everything there is light. There is praises continually there. And the mountains and everything up there are beautiful. The colors are beyond imagination. To spend eternity there with Christ and with your brothers and sisters.
